About

I'm a 23-year-old self-taught Moroccan designer with real-world project experience.

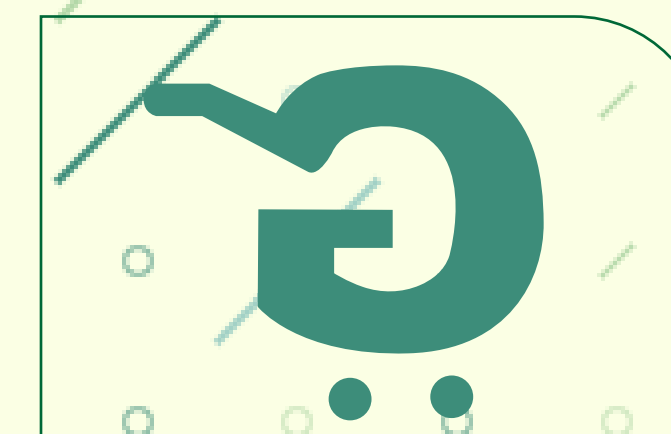

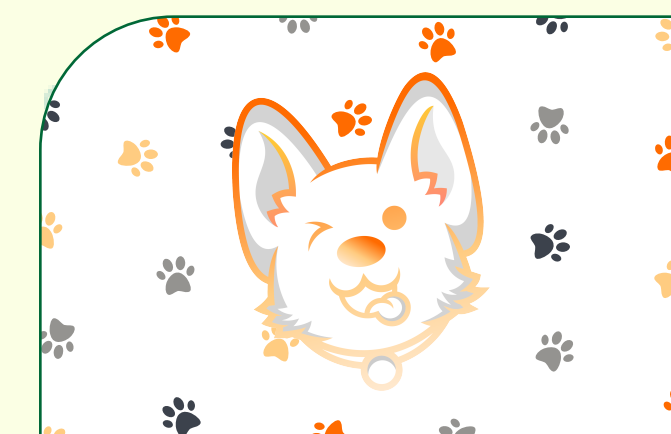

My design journey started in 2023 at Ark-X Academy while training as a Fullstack Web Dev—where I discovered my passion for visual storytelling.

But design kept pulling me back. Every job demanded creativity, from crafting SVG icons to designing full web-sites.

So here I am—a developer by training, a designer at heart.

My work

Here are fragments of my work either with an employer or with friends or even by myself :
